COMMENT SOUGHT ON NPSTC BROADBAND TASK FORCE AND PUBLIC SAFETY SPECTRUM TRUST TECHNICAL RECOMMENDATIONS FOR 700 MHZ PUBLIC SAFETY BROADBAND DEPLOYMENTS

WT Docket No. 06-150; PS Docket No. 06-229

Comments Due: April 6, 2010
Reply Comments Due: April 16, 2010

On August 14, 2009, the Commission's Public Safety and Homeland Security Bureau (Bureau) sought comment on petitions for waiver filed by a number of states and localities seeking to deploy public safety systems in the 700 MHz broadband spectrum.¹ On December 15, 2009, the Public Safety Spectrum Trust (PSST) filed a written *ex parte* in response, including a report compiled by the National Public Safety Telecommunications Council (NPSTC) Broadband Task Force (BBTF).² The PSST stated that it was submitting these recommendations "to the FCC for the minimum requirements necessary to allow localities and regions to build out local systems as part of the 700 MHz nationwide, interoperable wireless broadband public safety network."³ By this Public Notice, the Bureau seeks comment on both the recommendations of the PSST and the BBTF Report, and in particular those elements of the BBTF Report that address the technical aspects of the operation and interoperation of the regional networks the BBTF contemplates.

In particular, the Bureau seeks comment from those entities that have filed waiver requests with the Commission seeking to deploy in the 700 MHz broadband spectrum.⁴ Should we condition any

In addition, one commercial party, New EA d/b/a Flow Mobile, also filed a petition (filed July 7, 2009).

waiver disposition on adherence to the standards recommended by the BBTF and the PSST? Are these recommendations sufficient to ensure later compatibility with a nationwide interoperable broadband network for public safety? Does the BBTF Report provide adequate architectural details, specificity, consistency and precision to serve as the basis for conditions on waivers? If not, what modifications would serve this purpose? Could these recommendations provide a basis for evolution to new technological standards? Could these recommendations serve as an appropriate foundation for the work of the proposed Emergency Response Interoperability Center (ERIC)?⁵

Additionally we seek comment on several specific aspects of the technical recommendations made by the BBTF and the PSST, including:

- Recommendation 6.2 (Operations), and particularly those functions that the PSST suggests are “Requirements at Startup.”⁶
- Recommendation 6.3 (Technical), and particularly those addressed as “Minimum Applications” and “Security” features.⁷
