

SDR '06 Technical Conference Call for Papers

The deadline for abstracts for the SDR'06 Technical Conference has been extended to 15 June 2006. Please go to the SDR Forum web site (www.sdrforum.org) to access information on the Conference, to be held November 13-17, 2006 at the Wyndham Orlando Resort in Orlando, Florida.

Next SDR Forum Meeting

The SDR Forum 49th General Meeting will take place June 19-22 June in Vancouver, BC, Canada. Agenda, hotel, and meeting reservation information have been posted on the SDR Forum web site (www.sdrforum.org).

50th General Meeting in Munich – Make hotel reservations NOW

The SDR Forum 50th General Meeting will be hosted at the Rohde & Schwarz facilities in Munich, 11-14 September. Hotel reservations for this meeting must be made prior to 15 July. See the web site (www.sdrforum.org) for more information.

IEICE Conference and Product Exposition in Japan, 27-28 July

The IEICE Software Radio Study Group has announced its Technical Conference and Product Exposition to be held at Yokosuka Research Park, Japan, on 27-28 July. The Call for Papers and Exhibit Information can be found at www.ieice.org/cs/sr/eng/.

Smart Radio Challenge entry date extended to 15 June 2006

The date for entry forms for the Smart Radio Challenge has been moved to June 15. As a result, the final problems will not be published until June 30.

We have received many applications from prestigious universities, but apparently a paragraph in the "About the Challenge" on the original web page caused some confusion. It implied that the SDR Forum wanted a transfer of copyright and patents. This has now been corrected on the web site, and the new wording is copied below. Essentially, the SDR Forum would like publication rights, not the copyright or patent rights. We have therefore extended the entry date to accommodate any further participants for whom the original wording posed a problem. Please consult the web page (www.radiochallenge.org) for sample problems and FAQs as well.

NEW WORDING:

Intellectual Property: The SDR Forum intends to seek permission to publish proposals, design documents, engineering drawings, source code, analyses, and supporting material developed under the challenge entries. No materials shall be marked "proprietary."
