

Instructions for Nationwide and Non-Nationwide Carrier Aggregate Live 911 Call Data Reports		
Nationwide Carriers		
Section A	Test City	For each "Test City," click on the appropriate tab at the bottom of the template page to submit aggregate live 911 call data for that city.
	Reporting Period	For "Reporting Period," identify the calendar year quarter or quarters that the report covers.
Section B	Total Call Information	For "Total Call Information," insert the total of all live 911 calls. If any category of 911 calls is excluded from the total, use Section E (Exclusions) to identify the excluded category and the number of calls excluded.
Section C	Reporting by Technology	For "Reporting by Technology," enter each position technology or combination of technologies used, e.g., A-GPS, A-GNSS, OTDOA, UTDOA, AFLT, RTT, etc. If dispatchable location is used for location of any 911 calls, enter "Dispatchable Location" in this field.
	Yield	For "Yield (%)," using the methodology described in ATIS Standard 0500031, enter the percentage of total 911 calls that result in sending dispatchable location or x/y location with an accuracy that is within 50 meters.
Section D	Reporting by Morphology	For "Reporting by Morphology," enter the total calls for each morphology within the Test City
Section E	Exclusions	If any category of 911 calls is excluded from the compilation of live 911 call data, identify the excluded category and the number of calls excluded under that category.
Non-Nationwide Carriers		
Section A	Test City	For "Reporting Region," identify the region for which live 911 call data is being reported, as applicable to the provider: (1) the single Test City served, if only one; (2) if more than one Test City, half of the Test Cities served (as selected and identified by the provider); (3) the largest county by population within the provider's footprint if the provider does not provide service in any Test City.
	Reporting Period	For "Reporting Period," identify the calendar year quarter or quarters that the report covers.
Section B	Total Call Information	For "Total Call Information," insert the total of all live 911 calls. If any category of 911 calls is excluded from the total, use Section E (Exclusions) to identify the excluded category and the number of calls excluded.
Section C	Reporting by Technology	For "Reporting by Technology," enter each position technology or combination of technologies used, e.g., A-GPS, A-GNSS, OTDOA, UTDOA, AFLT, RTT, etc. If dispatchable location is used for location of any 911 calls, enter "Dispatchable Location" in this field.
	Yield	For "Yield (%)," using the methodology described in ATIS Standard 0500031, enter the percentage of total 911 calls that result in sending dispatchable location or x/y location with an accuracy that is within 50 meters.
Section D	Reporting by Morphology	For "Reporting by Morphology," if the provider's footprint covers only one of the morphologies, submit the aggregate data only for that morphology. If the provider's footprint covers more than one morphology, include in the "Combined" row the aggregate live 911 call data for a sufficient number of representative counties to cover each morphology and identify that number of counties.
Section E	Exclusions	If any category of 911 calls is excluded from the compilation of live 911 call data, identify the excluded category and the number of calls excluded under that category.
